## Who It Is For

---

-  Restaurants with limited counter space
-  Establishments needing high-temp sanitization
-  Users wanting app-based controls
-  Commercial kitchens prioritizing energy efficiency
-  Operators seeking easy installation
-  Facilities requiring durable, commercial-grade equipment

## Who It Is Not For

---

-  Home kitchens with limited counter space
-  Users without access to smart app connectivity
-  Operations requiring higher daily capacity
-  Spaces with strict space limitations
-  Users prioritizing lower noise levels
-  Budget-constrained facilities

## Trade Offs to Consider

---

-  Larger capacity models
-  Less energy-efficient alternatives
-  Models without smart app integration
-  Units with simpler control systems
-  Higher noise level counterparts
-  Less durable materials

## How It Compares

---

- Larger capacity models
- Less energy-efficient alternatives
- Models without smart app integration
- Units with simpler control systems
- Higher noise level counterparts
- Less durable materials

## Choose This If...

---

- ✓ Need compact, high-sanitizing undercounter unit
- ✓ Want smart app integration for monitoring
- ✓ Prioritize energy efficiency and certifications
- ✓ Seek easy installation and durable construction

## Skip This If...

---

- ✗ Require higher daily capacity
- ✗ Lack smart app connectivity
- ✗ Have strict space limitations
- ✗ Prioritize lower noise levels
