172 pounds for stable countertop placement

Who It Is For

-  Small kitchens with limited space
-  No permanent plumbing installation
-  Frequent users needing daily cleaning
-  Eco-conscious households
-  Those requiring portable storage
-  Users prioritizing stainless steel durability

Who It Is Not For

-  Large households needing more capacity
-  Those requiring built-in installation
-  Users desiring smart controls
-  Families with heavy dishwashing needs
-  Individuals needing low energy consumption
-  Those prioritizing app integration

Trade Offs to Consider

-  Larger capacity models available for bigger households
-  Higher energy consumption than compact units
-  Requires manual setup for faucet connection
-  No smart controls or app integration
-  Limited portability for extended use
-  Higher weight may restrict mobility

How It Compares

- Larger capacity than compact models
- Stainless steel interior vs. plastic alternatives
- Portable design vs. built-in units
- Higher energy use than energy-efficient models
- Manual setup vs. plug-and-play systems
- Limited smart features compared to premium units

Choose This If...

- ✓ Need portable dishwashing without plumbing
- ✓ Prioritize stainless steel durability
- ✓ Looking for energy-efficient operation
- ✓ Require compact storage solutions

Skip This If...

- ✗ Require built-in installation
- ✗ Need higher capacity than 10 place settings
- ✗ Desire smart controls or app integration
- ✗ Prioritize ultra-low energy consumption
